ANALYSIS AND REVELATION OF THE MESSAGES IN THE CROP-CIRCLES

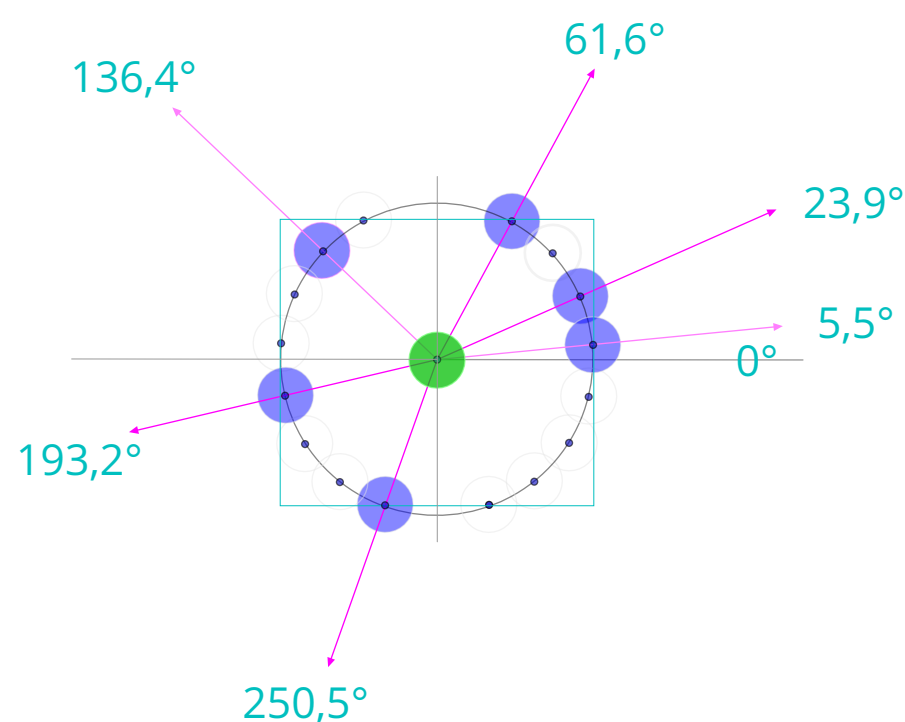

BY ESGEREMIAS, director of the Aldeias Project for the survival of humanity. I've been in contact with extraterrestrials since birth. Crop-circles are auxiliary forms in communication and must be analyzed in 5 ways: INTERNAL, EXTERNAL, PHYSICAL and MATHEMATICAL. And there may be TELEPATHY. To analyze correctly, you may need knowledge of geometry, geography and geoprocessing. See my other works:

SHIELD

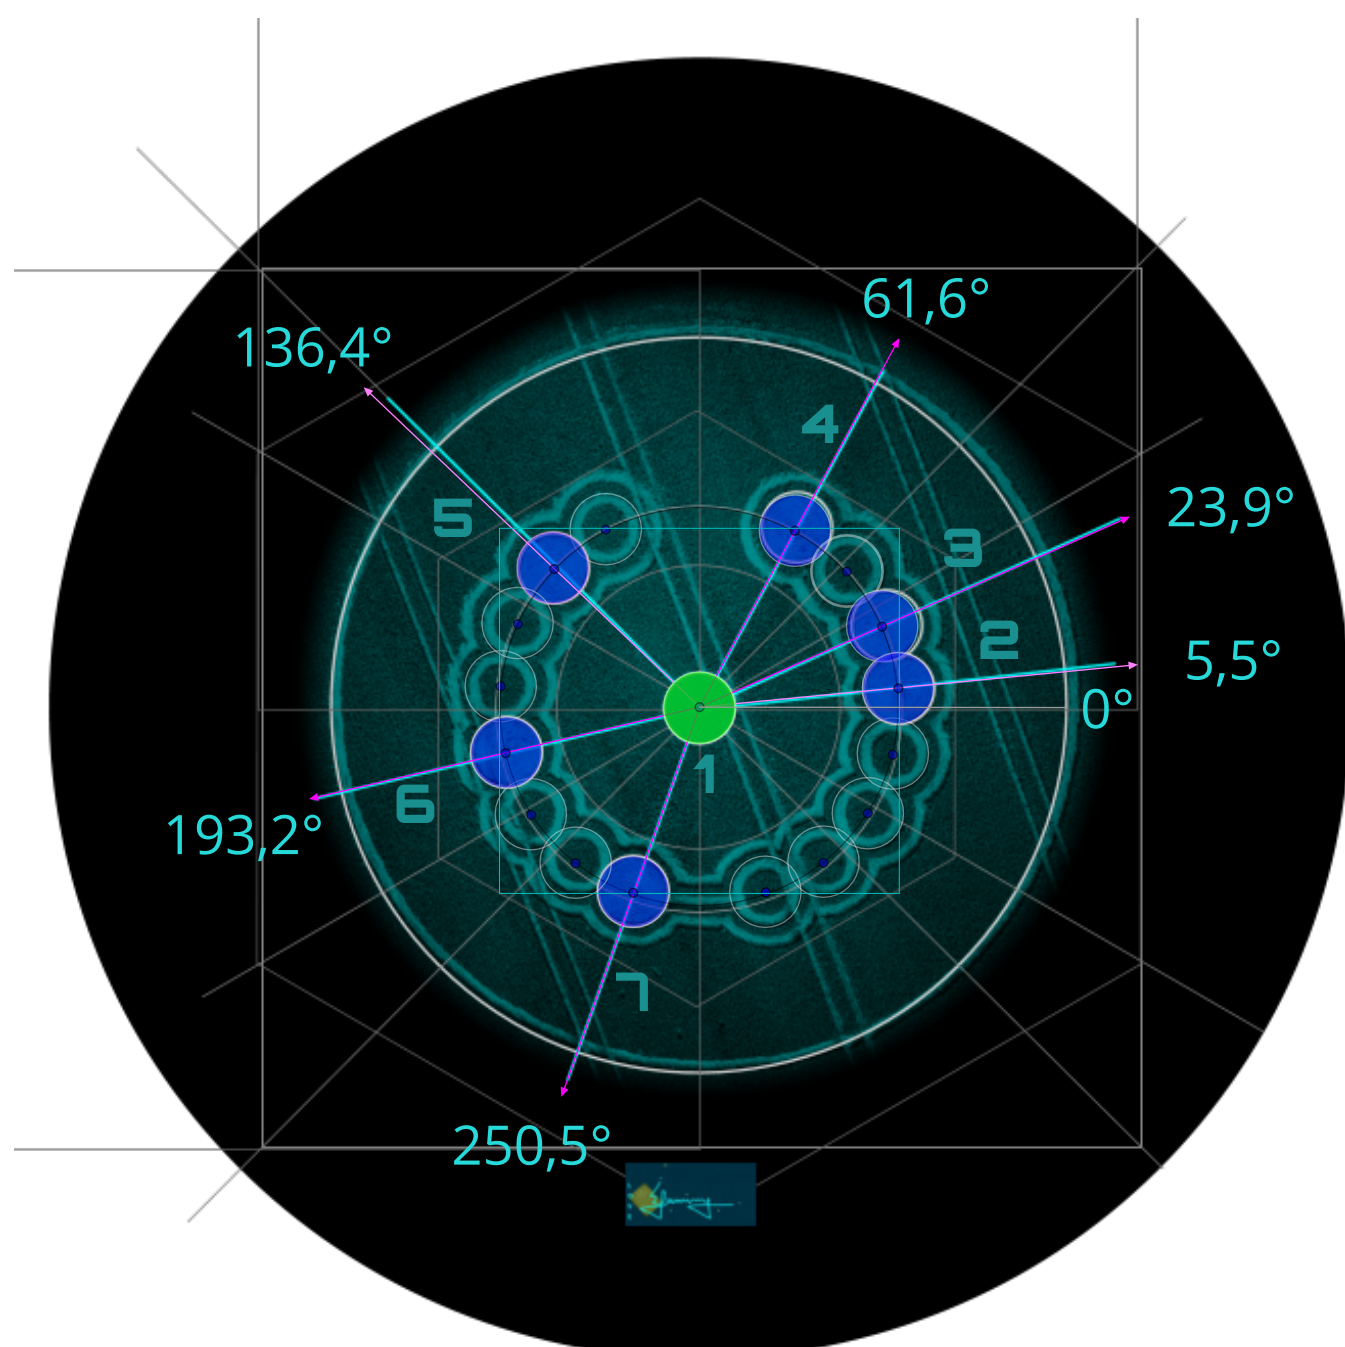

ALDEIAS FOR SPACE PROJECT

The first shield of Projeto Aldeias was the one above. Drawn by me in 1992, in 10 minutes and finished in 30 minutes. Then it received coats of paint and varnish. It was only in 2012 that he received the laurel wreath in celebration of his 20 years of struggle for contact and understanding with extraterrestrials, in particular researching the functioning of flying saucers. It was on that occasion that I received the information that humanity would have 6 planets to colonize, so I decided to add 6 green fruits to the drawing, but I resisted the impulse to scatter them irregularly, opting for symmetry. Three planets on each side, and in equal and symmetrical positions, as it was just a symbol. Ten years passed until in this Crop-circle of the Pilgrim, the positions of the planets for the new human colonizations were revealed.

Anyone can now sign up to live and work in the Aldeias of Projeto Aldeias.

Six new Earths in the habitable zone, with fauna and flora never seen before. Challenges and dangers await us there. When the shield was created I didn't know it was referring to new planets real. I thought that the 6 fruits would be planets, but with their positions being determined little by little as they were being discovered. Now we have an indication of 6 longitudes to be tracked. Some may ask; But how can Geremias know that these positions are longitudes of planets similar to our Earth? Haven't people already said that it 's the letters OM in the ASCII code? Yes, they said. In this case, telepathy was initially used to advise me to undertake the analysis of the circle, even without verifying its authenticity. Then they went into detail little by little until I discovered the relationships. The result is that they adjusted the "OM" mantra of creation in ASCII, to the 6 planets previously proposed in the shield of the Aldeias entity and to the position of 6 existing planets in space, in the approximate longitudes provided.

It also happens that it doesn't matter who made the crop-circle. Higher ETs can influence the minds of circle makers and then use the circles for their own messages. It wouldn't be too much to remember that they are millions of years ahead of us in every respect. In fact, it wouldn't be exaggerated to imagine that they have the minds of all human beings devices in their thinking and intelligent, futuristic things that we don't even have names to describe... Crop-circles are a beginning of communication. Snacks. Let us remember who gave us wheat and corn. They will only make greater contact. at the coordinates you provided, and with the leaders of Earth in attendance. They are SAVIORS¹ and that's how they should be treated.

1. Saviors in the physical sense, on the extinction of species, not in the religious sense.
